Summary

Backend and Infrastructure Engineer with hands on experience building cloud-native microservices and REST APIs in private cloud environments. Skilled in Go, Python, Kubernetes, and system design for a scalable and reliable backend system.

Technical Skills

Programming: Java, Go, Python
Backend: Microservices, REST APIs, Distributed Systems
Cloud/Infra: Kubernetes, Docker, Cloud Orchestration, Linux
Databases: MySQL, SQL Server
Tools: Shell Scripting, Git, NGINX

Work Experience

Dell Technologies

Jul 2025 – Present

Software Engineer II

Bangalore, Karnataka

- Designed and built 8+ REST APIs in Go with efficient data handling and optimized request processing for cluster configuration, validation, and node provisioning in private cloud environments.
- Developed a Python validation framework with 10+ modules, ensuring safe Day-2 lifecycle operations and preventing cluster-level failures.
- Improved deployment reliability by implementing automated prechecks and contributing 12.5% test coverage for upgrade workflows.
- Contributed to Kubernetes/Helm deployment pipelines and implemented SSH-based infrastructure integration for VM-level operations.

Dell Technologies

Jul 2024 – May 2025

Software Engineer Intern

Bangalore, Karnataka

- Designed microservices using Spring Boot with secure inter-service communication (mTLS, IAM) in distributed environments.
- Contributed to CI/CD pipelines using Docker, improving deployment consistency and release efficiency.

Axciom Consulting Pvt. Ltd.

Feb 2023 – Aug 2023

Software Developer – Trainee

Noida, Uttar Pradesh

- Developed business logic and UI components for Dynamics 365 ERP using OOP principles, reducing data entry errors by 20%.
- Optimized SQL queries and stored procedures in SQL Server, improving database response time by 20%.

Projects

AI PR Reviewer | Python, LangGraph, LangChain, Google Gemini API, GitHub Actions

2025

- Built an AI-based code review system using multi-agent pipelines for automated PR analysis.
- Designed fault-tolerant workflow with retry logic, issue deduplication, and merge-gating based on severity.
- Integrated GitHub Actions for automated CI feedback and code quality enforcement.

TeleMock – Secure Telemetry Pipeline Simulator | SpringBoot, Python, React, NGINX, Docker Aug – Nov 2024

- Designed a distributed telemetry processing pipeline using Spring Boot microservices and Python clients for real-time data streaming, validation and service to service communication.
- Configured NGINX reverse proxy with mTLS and built a React.js dashboard with H2 in-memory database for real-time telemetry visualization.

WhatsApp Chat Analyzer | Python, Streamlit, Pandas, Matplotlib

Aug 2023

- Built a data analysis tool with Streamlit and Matplotlib that preprocesses chat exports into Pandas DataFrames for message frequency, word count, and trend analysis.

Education

Dr. B R Ambedkar National Institute of Technology Jalandhar

Aug 2023 – Jun 2025

Master of Technology in Computer Science and Engineering – CGPA: 8.18/10.0

Jalandhar, Punjab

Kashi Institute of Technology Varanasi

Nov 2020 – Jun 2023

Bachelor of Technology in Computer Science and Engineering – CGPA: 7.78/10.0

Varanasi, Uttar Pradesh

Achievements

- Qualified GATE (Computer Science), 2022 & 2023
- Runner-up, Smart India Hackathon 2022 (National Finalist).
- Teaching Assistant for 80+ students at NIT Jalandhar.
